- XII completed 2018

Aakash Model Sr. Sec. School, Baljeet Vihar, New Delhi
- Xth completed 2016

PERSONAL PROJECTS

[Portfolio](#) — use *Reactjs*

This portfolio is created from scratch and almost all styling is done by Vanilla CSS. Also, added animation and some API's like chat-bot.

[BurgerX](#) — use *Reactjs, Redux, and Firebase*

This web app is created for making your own burger by selecting given items according to their price. For backend, Firebase is used through which all data like user delivery address, price etc. will be saved there.

[Instagram-clone](#) — use *MERN Stack*

As most of us will know and use Instagram, this web app is similar to that. Users can create their account, upload the post, upload or update their profile, like and comment on any post, delete their post that he/she posted and follow other users as well and this is all done by Restful APIs. All data will be save in MongoDB.

[Slack-clone](#) — use *Reactjs, Redux, and Firebase*

This web app is similar to Slack. By using Firebase an user can create their own channel or enter any already present channel and talk to all of the users who are connected to that channel.

[My-Docs](#) — use *Nextjs, Firebase, and Tailwind CSS*

Similar to Google docs created using next js. Authentication done using firebase auth and saving doc file and its data in firebase.
Next js makes the site fast and provides server side-rendering.

SKILLS

PROGRAMMING LANGUAGES

C, C++, Python

WEB DEVELOPMENT

HTML, CSS, Javascript, ReactJs, Redux.Js, Node.Js, Express.Js, Next.Js, Socket.io

DATABASES

MongoDB, SQL

FIREBASE

Firestore, Realtime DB, Storage, Cloud Functions

EXPERIENCE

1. BEST ENLIST – React Developer

– April 2021 – June 2021

In a 3-month period, I learn Flutter and implement it on a project. After that I built a form like google form using react for the company. Also I make 1-2 small websites containing approx. 9-10 pages using React.

2. IEZAL Pvt. Ltd. – Full Stack MERN Dev.

– August 2021 – October 2021

It is a startup company related to e-learning. Here, I built many webpages and worked on both the frontend as well as backend side. Here, I learnt about socket, payment gateway and an idea of flask in python and implemented all as well.
